### User Manual

Did you know that there is a User Manual for the new MSTWeb Tracking Website by IQgistics? You can find the button at the top of the screen next to the other top bar icons.

If you click on the User Manual button it will open a new tab and allow you to either search or browse the manual. There are topics there about the User Settings (so you can configure your login for you), the Live Map and other items that you can either configure or get a better understanding of what is available. The search function works just like it does when you search using Google. For example, if you wanted to change the name of the vehicle, you can enter "change the vehicle name" (with the quotes) and it will pull up the Edit Unit section so that you can see where to change the vehicle name.

Even with this online manual, you can still call us directly and we can answer your questions, we are here to help you.

### Quick Tip

The Quick Tip for this month is how to change the odometer setting on a vehicle. While in the new tracking website, double click on the vehicle that you want to set the odometer. When the right side window shows up, click on EDIT UNIT. this is where you can change the odometer to be the current value. The next time the vehicle reports, the odometer will be correct.

### Need the Mobile App?

Do you need to download the mobile app to use? Follow this link to our website for the specific link and setup information: [Mobile Apps](#)
