New History Upgrade

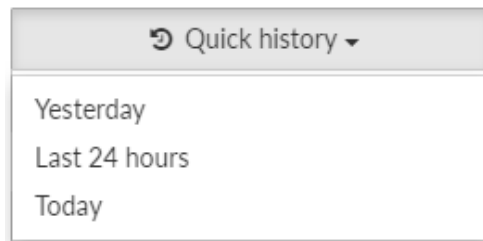

We have a new History Upgrade to let you know about. The History section of the tracking website will now automatically scroll back to the same position in the History Detail Grid as where you started. In the past, the History Detail Grid would always reset back to the top of the History, now if you click on the location in the History Detail Grid to see the plotted position, when you go back to the History Detail Grid, you will be in the same location in the list that you started. This will keep you from having to scroll back down to the location that you were at while investigating the history of your vehicle.

If you have any questions about this upgrade or anything else, please reach out to us by phone or email and we will help you any way that we can. Stay Safe during this time.

Quick Tip - Quick History (New Website)

Do you want to quickly see the history of a vehicle?

Double click on the vehicle on the left side and then click on Quick history and choose Yesterday, Last 24 hours or Today from the drop down. This is a quick way to get history on a single vehicle without having to go through the process of running a report or clicking on history to fill out the form to get the history.

Need the Mobile App?

Do you need to download the mobile app to use? Follow this link to our website for the specific link and setup information: [Mobile Apps](#)
